

FLOODPLAIN MANAGEMENT

Hiring an experienced, Certified Floodplain Manager can often place a significant strain on a community or municipality's budget. In addition, it can sometimes be difficult for one person, or even a small team, to keep up with all of the requirements of effective floodplain management.

With a Certified Floodplain Manager on staff, ELOS can help communities more efficiently protect themselves from flooding, become more resilient, manage development, and remain compliant with FEMA's National Flood Insurance Program (NFIP) standards.

Services Offered

ELOS' Certified Floodplain Manager and experienced staff can assist with a wide range of floodplain management services, including:

- Permitting for development in the floodplain and enforcement of the community Flood Damage Prevention Ordinance
- Maintain records and documents that keep the community eligible to participate in FEMA's NFIP and Community Rating System (CRS)
- Review all floodplain-related projects received from federal and state agencies to ensure compliance with FEMA, National Flood Insurance Program (NFIP), and local Flood Damage Prevention Ordinance requirements
- Function as the community representative for all floodplain management and flood mitigation projects
- Assist in the preparation of Standard Operating Procedures (SOP) for the local Floodplain Management Program

Give us a call today, and let's discuss how ELOS can help with all of your floodplain management needs, making sure your community is best protected from flooding and unexpected drainage issues.
